Art Unit: 2833

Claims 1-5 are objected to because of the following informalities: The claims (and specification and abstract) contain various instances of poor wording (e.g. claim 1, line 8, "shape likes T" should be – is shaped like a T --). The entire disclosure must be reviewed for conformance to U.S. standards of grammar and terminology.

Appropriate correction is required.

Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It is very unclear how 270 degree rotation and 180 degree swinging can occur, particularly due to the poor quality of the drawings. It is unclear what the axles are and how they intersect each other perpendicularly; what the groove is; and what the slip-proof washer is. Thus the claims cannot be further examined on their merits.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the groove, axles, slip-proof washer, and the means for allowing 270 degree rotation and 180 degree swinging must be shown or the feature(s) canceled from the claim(s). Also, reference numerals should be included in all of the figures. No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
